Top Tips

The secret to success? Practise little and often! Can you learn these on your way to school? On a car journey? Or even at the breakfast table? You don't need to learn them all at once: start with those you are more confident with before tackling the rest. Why not practise whilst keeping active? You could throw and catch or kick a ball whilst learning them!

Songs and Chants - You can buy Times Tables CDs or find multiplication songs and chants online. You can also use songs on Youtube and websites www.timestables.co.uk and www.timestables.me.uk 2 x tables song

2 Times Table Song (Cover of Can't Stop The Feeling! By Justin Timberlake) - YouTube Use what you already know - If your child knows that $2 \times 5 = 10$, they can use this fact to work out that $2 \times 6 = 12$

Test the Parent - Your child can make up their own tricky division questions for you e.g. What is 18 divided by 2? They need to be able to multiply to create these questions
