### Top Tips

The secret to success? Practise little and often! Can you learn these on your way to school? On a car journey? Or even at the breakfast table? You don't need to learn them all at once: start with those you are more confident with before tackling the rest. Why not practise whilst keeping active? You could throw and catch or kick a ball whilst learning them!

### Ideas for games!

**Songs and Chants** - You can buy Times Tables CDs or find multiplication songs and chants online. You can also use songs on Youtube and websites [www.timestables.co.uk](http://www.timestables.co.uk) and [www.timestables.me.uk](http://www.timestables.me.uk)

**Use what you already know** - If your child knows that  $5 \times 10 = 50$ , they can use this fact to work out that  $6 \times 10 = 60$

**Test the Parent** - Your child can make up their own tricky division questions for you e.g. What is 100 divided by 10? They need to be able to multiply to create these questions.
